PROFILE

Passionate web developer skilled in **JavaScript, TypeScript, React, NextJS, Tailwind, Firebase**, and other modern technologies. Dedicated to driving innovation and fostering growth in the tech sector.

WORK EXPERIENCE

Junior Front-end Web Developer

Sept 2023 - Ongoing

Doctocart

Webysis Technologies

- Engineered a high-performance, responsive UI for the home page of the DoctoCart e-commerce app.
- Conducted thorough API testing to guarantee seamless data retrieval and rendering for a diverse array of medical equipment listings.
- Orchestrated the deployment of project code on GitHub, establishing robust version control practices and overseeing live website deployment.

React.js Developer

Dec 2022 - Apr 2023

Sanctuary Store

Invicta Ltd

- Spearheaded the development of the e-commerce website's product page, focusing on optimizing user experience.
- Collaborated closely with the design team to seamlessly integrate visually captivating product displays, resulting in a significant boost in user engagement.
- Implemented user-centric CRUD operations, enhancing the interactive functionality of the product page.

TECHNICAL SKILLS

- Languages:** HTML5, CSS3, JavaScript, TypeScript, Markdown
- Technologies:** React, NextJS, jQuery, Tailwind, Bootstrap, Redux, shadcn/ui, MaterialUI, Styled-Components, etc
- Tools:** Git, GitHub, ClerkAuth Postman, Shopify, ViteJs, Webpack, npm/yarn, VScode, etc

PROJECTS

EdTek - LMS Platform

[GitHub](#) | [Website](#)

- Built a secure and efficient LMS platform using Next.js, with user authentication and Stripe integration for seamless enrollment.
- Developed a robust admin dashboard for course management, pricing settings, and analytics tracking.
- Crafted API routes for streamlined data retrieval and submission, hosting the database on Railway, and deploying the project on Vercel for optimal performance

GymBull - Gym Exercise App

[GitHub](#) | [Website](#)

- Engineered a comprehensive gym exercise web application with advanced search functionalities.
- Employed modular components for customization, implemented intuitive navigation, and optimized performance through efficient bundling techniques.
- Successfully integrated an external API, seamlessly fetching and displaying data to enhance the application's content and functionality.

Trippz - Travelling Agency

[GitHub](#) | [Website](#)

- Designed and implemented a polished, responsive interface for a React-based website.
- Engineered dynamic and responsive user interfaces by skillfully crafting React components, seamlessly integrating React Router for efficient single-page application navigation.
- Implemented robust state management in React, fostering a smooth and reliable web experience grounded in responsive design principles.

EDUCATION

Veer Surendra Sai University of Technology

Sambalpur, Odisha

Bachelor Of Technology in Electrical Engineering

Aug 2015 – June 2019

- Cumulative GPA : 6.61/10.0
