WORK EXPERIENCE

HyScaler

SDE-1

Aug 2025 - Present

- Integrated Gemini, Amazon Bedrock, and OpenRouter into Gen AI applications with structured outputs; developed RAG microservice with Postgres + pgvector for 75–80% improvement in context-aware responses.
- Implemented document extraction pipeline using Docling + Unstructured with Hugging Face embeddings; streamlined bug triage and sprint processes into a single automated workflow.

Junior Software Developer

Aug 2024 - July 2025

- Built ADP Marketplace onboarding microservice with employer lifecycle management.
- Optimized large file processing with Node.js worker threads, reducing downtime to zero.
- Improved query performance with MongoDB aggregation pipelines, removing timeouts.
- Automated monthly emails and membership activation/deactivation via cron jobs, removing manual CSV workflows.

Software Developer Apprentice

Jan 2024 - July 2024

- Implemented Spatie Role-Permission package and Laravel queues for scalable task processing.
- Developed dynamic forms and admin features in Laravel with Blade + Livewire.

Infophy (Formerly Webysis)

Frontend Web Developer

Nov 2023 - Jan 2024

- Integrated WooCommerce REST APIs for dynamic product display.
- Managed application state with Redux for complex UI interactions.

Frontend Developer Intern

Sept 2023 - Nov 2023

- Designed responsive landing page and seller dashboard with deployment workflows.

Invicta Ltd

Frontend Developer

Dec 2023 - Mar 2024

- Integrated Shopify GraphQL APIs for product data and checkout functions.
- Built responsive product pages with clean UI across devices.
